Karuna Cancer Hospital and Dialysis Centre

World Health Organisation defines “Palliative Care” as “the active total care of patients whose disease is not responsive to curative or life-prolonging treatment. Control of pain, of other symptoms and of psychological, physical, social, economic and spiritual problems is paramount”. The goal of palliative care is the achievement of the best possible quality of life for patients and their families.

We started our initial venture “Karuna Pain and Palliative Care” at Kariparambu in 1998. Home care, Palliative care, Drug bank, Medical camp, etc., were carried out by the same.

In 2013, we started “Karuna Cancer Hospital and Research Centre” in Pallippadi on account of the rapid rise of cancer incidence and the people’s inability to bear the cost of treatment.

In 2018, we stepped another milestone by starting state of the art dialysis unit with 30 machines, which is purely committed to help reduce the cost of kidney patients.

Objectives

- A solution to the health care crisis in Malabar region
- A seven storied building in 57420 sq feet area, with latest diagnostic equipments, for better treatment of poor patients, free of cost.
- Provide medical care for Cancer, Drug addiction, Mental illness at an early stage and thereby taking a society to a healthy living.

Departments

Oncology Department

1. The service of a medical Oncologist.
2. Lab facilities for OP and IP patients.
3. 24 hours OP and IP care for the patients with the following malignancies.

- Thoracic
- Breast

Amenities

Prayer Hall

Facilities

- **Ultra Sound Scanning Machine**
- **Mammography Machine**
(Early detection of Breast Cancer)
- **Digital X Ray Machine**
- **Well resourced pharmacy: free medication**
- **Computerized laboratory**
- **General ward and rooms**

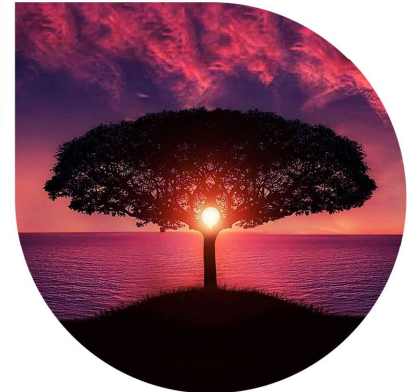

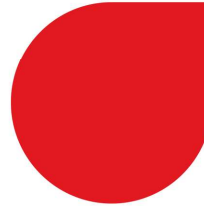

Kidney Care Unit

The implementation of a full-fledged dialysis centre backed up by world-class dialysis machines imbibing state of art technologies is completed. The unit comprises of 30 Dialysis machines. We would like to plan with three shifts.

Why dialysis center?

- Increasing incidence in the number of new cases of chronic kidney disease patients in Kerala.
- Patients are left with the option of either dialysis or kidney transplantation, which most cant afford.
- Less than 300 dialysis units are available in entire Malappuram district rendering it highly impossible to cater the entire population of CKD patients here.

Treatment and food free of cost.

Your prayers and financial helps are all-important
to turn these milestones into stepping stones
